13,6% vol.

Vin biologique  
certifié par FR-BIO-10  
Agriculture France

75 cl.

Lot2301

<b>Name</b>	<i>Radicalement rouge</i>
<b>Vintage</b>	<i>2022</i>
<b>Appellation</b>	<i>IGP Val de Loire</i>
<b>Blend</b>	<i>Cabernet franc and Cabernet sauvignon, Gamay and Grolleau noir</i>
<b>The Vines</b>	<i>Our 27 hectares of vines are all situated on a plateau 93m above sea level, south of the river Loire. They are planted on sandy clay soils with outcrops of black slate. The vines have been farmed organically since 2000.</i>
<b>Vinification &amp; ageing</b>	<i>We hand-harvest the whole vineyard and use only natural yeasts for fermentation. The harvest for the reds began with the Gamay on September 1st, followed by the Grolleau noir mid-September and the Cabernets from the end of September. Some of the Cabernet franc was whole-bunch fermented with carbonic maceration, as was all of the Gamay and some of the Grolleau. The remainder was de-stemmed and fermented in tank with one or two pumping-overs during an average of 2-weeks soak. No oak for this wine. Blended and lightly filtered before bottling with the addition of 2g/hl of sulphur.</i>
<b>Vintage description</b>	<i>2022 was an extremely hot and exceptionally dry year which tested the resistance of our vines to the full. Thanks to the mulching of cover crops, a deep root system and a few drops of rain just prior to harvest, our vines produced some wonderful and perfectly ripe grapes in reasonable quantities. The vine is an amazing plant !</i>
<b>Alcohol / vol.</b>	<i>13,6%</i>
<b>Sulphur</b>	<i>Only a small amount at bottling. No other additive is used at any time.</i>
<b>Dry materials</b>	<i>Ultra-light Burgundy bottles, DIAM3 corks, label, back label, neck label, no capsules.</i>
<b>Total production</b>	<i>29,000 bottles</i>
